¹A minimum of 120 credit-hours is required to graduate (average 15 credit-hours per semester).
Courses in italics have a lab component (generally indicating a larger time commitment).

²General Physics satisfies the Natural Science Core (CDN) requirement.

³Calculus satisfies the Quantitative Core (CDQ) requirement.

⁴Modern Physics satisfies the Natural World Franciscan Core (CFN) requirement.

⁵This requirement can be satisfied by taking *ASTR 380: Observational Astronomy* (a 3-credit course offered in the fall), or by completing the Astrophysics Minor.
